Abstract (en)

The device has security labels (41, 42, 43, 44, 45, 46), each forming guarantee seal, affixed inserted in a recess arranged in peripheral wall of a case (1). The label covers a zone of junction of parts (11, 12, 13) of the case before being subjected to a relative displacement to permit access in an enclosure defined by wall. The recess has a size corresponding to that of the label and a depth higher or equal to the label thickness.
