Abstract (en)  
Cooling fins (2) can be removed individually from the vessel casing. The cooling fins are connected to form one or more cooling fin assemblies (3, 4) which can be removed entire from the vessel casing (1). A connecting line (5) (e.g. of threaded rods with spacer nuts (6)) holds the assembly together. A clamp (9) connects the ends of an assembly, or different assemblies, together. Fins are U-shaped in cross section. The connecting line is passed through the limbs of the U-profiles.
