Abstract (en)
The present invention relates to an improved cellular phone casing capable of storing a cellular phone (a mobile phone) from an external impact when a cellular phone is stored in a bag and is carried and capable of preventing a cellular phone from moisture in rain or at a beach. The cellular phone storing casing comprises a casing body (2) that has an inner storing space having a certain size and depth for storing a common cellular phone wherein an upper side of the same is opened for an easier storing and unloading of a cellular phone; a cover body (3) that is fabricated in separation with the casing body and stores or unloads in a state that a cellular phone is sealed in the inner storing space of the casing body wherein the cover body is opened and closed with respect to the casing body; a hinge connection part (5) that is designed so that the cover body is rotatable with respect to one surface of the casing body; and a locking part (4) sealingly engages or opens the cover body with respect to the casing body.
