Abstract (en)
[origin: WO2004100692A1] Footwear, comprising an upper (13), made from an upper material (17) with an upper material end region (27) on the sole side and a waterproof functional layer (19), with a functional layer end region (23), arranged on the inner side of the upper material (17), an inner sole (15) and a connecting device (25), connecting the upper material end region (27) to the inner sole (15), which leaves a separation (33), running around at least a part of the circumference of the upper between the upper material end region (27) and the inner sole (15), such that the connection device (25) may be run through on application of a liquid sealing material (37; 39). The functional layer end region (23) extends at least into the region of the connecting device (25) and is sealed in a watertight manner by the sealing material (37; 39) reaching the functional layer (19) through the connecting device (25) on production of the footwear.
