Abstract (en)

[origin: WO2004101342A1] The invention relates to an internal ceiling cladding for a large vehicle for passenger transport, in particular, a rail vehicle, with a cladding element (1), arranged in the vicinity of a door drive and arched elements (4) adjacent thereto. The cladding element (1) is provided as base module and comprises a surface (1a) on the side thereof facing the vehicle longitudinal centre for the exact matching up of a further cladding element (2).
