Abstract (en)
[origin: WO2004097305A1] The known cooking devices consist of a cooking area (1), a door (9) for closing said cooking area and a lighting system (21, 39) for lighting the cooking area (1) which comprises at least one reflector (39) arranged in the internal space of the door (9) and reflecting light emitted by a light source (21) of the lighting system in said cooking area (1). In order to reduce mechanical strain applied to the light source, it is disposed outside the door (9) and emits light towards the reflector (39) arranged inside said door (9).
