Abstract (en)
[origin: DE10320871B3] The sample depositing system, especially for a cell sorting apparatus, has a sample feed tube (38) and a tube guide (39) and a micro-titration plate (36) or sample strip to take separate PCR samples in different sample vessels. The sample receptacle has movement to position the sample vessels, while the sample feed remains static, held in place by a magnet (40). The sample depositing system, especially for a cell sorting apparatus, has a sample feed tube (38) and a tube guide (39) and a micro-titration plate (36) or sample strip to take separate PCR samples in different sample vessels. The sample receptacle has movement to position the sample vessels, while the sample feed remains static, held in place by a magnet (40). The sample (36)/sample strip is within an incubator (37).
