Abstract (en)
[origin: WO2004100080A1] The invention relates to a housing (1), particularly of a tachograph, provided with a battery holder (2) on the housing (1), and with at least one fastening means (5) for fastening the battery holder (2) to the housing (1). Prior art solutions offer unwanted various possibilities for carrying out a fraudulent manipulation. For this reason, the aim of the invention is to mount a battery in an exchangeable manner on the housing whereby preventing the possibility of manipulating the components inside the housing during a changing of the battery. To this end, the invention provides that, when the battery holder (2) is mounted on the housing (1), the fastening means (5) can only be accessed from the inside of the housing.
