Abstract (en)

A numerical control machine (10) for the realization of junction elements, specially adapted for making tenonig, mortising, holes, slots and the like, on semifinished products destined to the furniture manufacturing, comprises an framework (12) featuring a work table (14) on which the pieces to be processed are stabilized by means of strikes (16) cooperating with pneumatic cylinders (18) or the like; said machine is provided with a first slide (22') moving along one or more horizontal guides (22) defining an "X" axis and a second slide (20'), operatively connected to said first slide and featuring at least one operative unit (32).
