Abstract (en)
[origin: EP1623933A1] The separator has a blocking unit (1) including webs (4, 5) that are connected by a transversal web (3), which is supported against an edge of a glass sheet. The webs (4, 5) are oriented along a direction parallel to a principal plane of the glass sheet. One of the webs (4, 5) is supported against a material strip. The webs (4, 5) are subjected to lateral clearance for adapting to the sheets of different thicknesses.
