Abstract (en)

The present invention relates to a movable unit used for emergency relief operations, which is designed for rescue services etc., and which has the following advantages: it can be installed and can be rendered fully effective in only 6 to 7 minutes by only two unskilled persons, without the need of special tools like electric drills etc. The electric equipment and lighting system is already integrated in the movable unit and is fully effective (ready for use). The movable unit can be opened or closed in a bellows-like fashion so that it is easily transportable due to its compactness.
