Abstract (en)

A photo-manager (9) for recording/playing audio signal is provided. The photo-manager comprises an identifying device (3), for identifying an identification code (81) of a photo (8); a micro-controller (1), connected to the identifying device; an audio recorder/player chip (2), connected to an audio device, for storing the recording/playing audio signal, wherein when the identifying device identifies the identification code of the photo (8) and transmits the identification code (81) to the micro-controller (1), the micro-controller locates an address corresponding to the identification code stored in the audio recorder/player chip (2) to play the audio signal corresponding to the address via said audio device or an audio data received by the audio device is stored at the corresponding address.
