Abstract (en)  
A game machine of the present invention has a slot (13) that receives a medal, a medal guide portion (12) having a guide face (12a) that inclines downward toward the slot (13) and that guides the medal, and a medal mount (11) that is provided in the vicinity of the medal guide portion (12) and that enables a large number of medals to be mounted thereon. The guide face (12a) has contact portions (P1) that come into contact with an outer circumference of the medal in two points when the medal is mounted on the guide face, where a distance between the contact portions is smaller than the diameter of the medal.
