Abstract (en)

[origin: EP1624731A2] A control circuit for a fluorescent lamp comprises a half-bridge circuit (Q1,Q2) giving a supply voltage with a coupled oscillator circuit (L1,C1) to which at least one lamp (10) is connected and a diagnostic circuit (30) with resistance (R1) coupled to the oscillator and to a current-voltage converter (31) and an evaluation circuit (32). Independent claims are also included for the following: (A) a diagnostic process for a fluorescent lamp as above; and (B) a control circuit for the above.
