Abstract (en)
[origin: WO2004100718A1] Disclosed is a piece of furniture comprising a movable part, especially a drawer or a door, a drive unit, and a device for mechanically transferring power from the drive unit to the movable part or the body of the piece of furniture, particularly a peg that is disposed on a lever which can be driven by the drive unit, so as to eject and/or retract the movable part. The device (4) for mechanically transferring power is placed inside a guideway (8) in order to transfer traction forces and pushing forces.
