Abstract (en)
[origin: WO2004103121A1] Mechanism (1) for office chairs and the like, comprising a main body (2), a support element (7) for a back (8) turnably engaged with the main body (2) through first mounting means (9), a prop element (10) for a seat (11) mounted onto the main body (2) through the second mounting means (12), in which the mounting means (9) are partially or wholly arranged within said main body (2). It can also be provided for at least two Types of mounting means (12) that can be interchangeably mounted onto the main body (2), so as to change the type of mechanism (1) according to type of a second mounting means (12) being used. It can be provided for connecting means (16) between the prop element (10) and the support element (7).
