Abstract (en)  
[origin: WO2004103192A1] The invention relates to a device for aligning a human or animal vertebral column. Said device comprises a fixing bar (12, 40, 42), which fixes at least two vertebral bodies (44), can be attached to at least two fastening elements (16) that can be anchored to the vertebral column and can be secured to the fastening elements (16) by screws (20) or other fastening means. Longitudinal cavities (29, 29') are configured in the fixing bar (12, 40, 42) in an axial direction. The screw (20) or other fastening means pass/passes through said cavities in order to fasten the fixing bar (12, 40, 42) to the fastening element (16).
