## Abstract (en)

[origin: WO2004100981A1] The invention relates to one or several enzyme-containing compounds, i.e. to one or several hydrolyses and to one or several antioxidants which are selected from ubiquinones, carotinoides and antioxidative vitamins. The inventive compounds are used in the form of components for producing food products or drugs which are used, inter alia as dietetic food supplements, in particular for a supplementary dietetic regime and for treating immune system disorders.
