Abstract (en)

[origin: WO2004103750A1] The invention relates to an exterior door for a vehicle, which is guided in a sliding manner in guide rails (2, 3). At least one guide rail (2) comprising a first section (4) that runs diagonally to the door plane and a second section (5) that runs parallel to said plane is mounted in a fixed manner on the bodywork. A door guide rail (3) is located in the vicinity of the lower edge (7) of the vehicle door (1). The door rail (2) that is fixed to the bodywork is located in the vicinity of the upper edge (6) of the vehicle door (1).
