Abstract (en)

[origin: WO2004105195A1] An electrical connector member (1) consisting of a contact block (2) and handle (8) connected removably by a coupling device comprising an elastic member (6) made integral with the contact block (2) near a proximal end (24) of the contact block (2) and having an outward protruding end part (63) able to snap engage elastically in a through hole (86) formed near a proximal end (81) of the handle (8).
