Abstract (en)

[origin: EP1626139A2] The present invention concerns a noise-reducing device (10) for water run-off channels (13) of the type provided with run-off drains (14) at the bottom. The device (10) is equipped with a floating plate (2) in turn comprising means (3) for staying engaged with the run-off drain (14) as the water level in the channel (13) varies and spacer means (4) to provide a water passage section, also with virtually zero water level in the run-off channel (13).
