Abstract (en)

[origin: WO2004089647A2] The object of the invention is to provide letter trays for filing documents, so that a plurality of letter trays can be stacked inside and upon one another, occupy little space and when stacked form a vertical stack. This is achieved by letter trays comprising a bottom, two side walls, a rear wall and a front opening opposite the rear wall with outwardly inclined side walls and outwardly oriented supports arranged on the front, outwardly inclined edges of the side walls, said supports being supported on the upper edge of the side walls of a letter tray that acts as a support, and said supports forming an angle with the approximately horizontal upper edge of the side walls which is smaller than 90 DEG .
