Abstract (en)
[origin: WO2004086433A2] The invention relates to a switch device (1), especially for a household appliance, said device comprising an actuating element (2) and a switching or regulating element (3) which is connected to the actuating element (2). The aim of the invention is to create one such switch device which is quicker and easier to mount. To this end, the switching or regulating element (3) and the actuating element (2) are connected by means of a catch connection (13) which comprises a first catch element (15) connected to the switching or regulating element (3), and a second catch element (12) connected to the actuating element (2).
