Abstract (en)  
The present invention relates to containers 2 comprising a series of panels and a line of weakness 16 along which a part 6 of the container 2 can be separated from another part 4 of the container 2. The line of weakness 16 is arranged in a fashion such that it crosses a straight line connecting two points on the line of weakness 16 at least once. The two points connected by the straight line are located on the same panel of the container 2.
