Abstract (en)

[origin: EP1627827A2] The packaging comprises a lower part (3) and lid (4) which can be detachably connected together through complementary edge regions (5,6). The lower part has a support face for each pastry (2) designed so that with proper use the pastry is inclined so that its point (9) is lower than the axially opposite top side (10). At least a part of the support face is formed by a trough-shaped area (7) adapted to the shape of the pastry.
