Abstract (en)  
[origin: EP1628070A2] The lighting device has a housing (1) containing a light source (3). The reflector (4, 5) is made in at least two parts: a primary reflector (4) and a secondary reflector (5). The two reflectors are arranged with the light source between them. The light source has a louver (R), which carries the primary reflector, so that this reflector can be more easily changed.
