Abstract (en)
[origin: WO2004103880A1] The invention relates to a portable test lever comprising a work arm and a force arm for efficient examination of the drive capacity and/or an acceleration capacity of a lift. Said test lever comprises an integrated measuring receiving element, a receiving element which is arranged on the work arm and at a distance from the force arm, especially at least one cable receiving element and a support. The invention also relates to a method which is used to measure the drive capacity of a lift cable and/or the acceleration capacity of a lift.
