Abstract (en)

[origin: WO2004106741A1] Apparatus for connecting together at least two compressors (17) used in refrigeration or air conditioning systems, which apparatus comprises a suction header (16), a discharge header, an oil header, oil return lines and an oil reservoir, which apparatus is such that the suction header (16), the discharge header, the oil header, the oil return lines and the oil reservoir are connected together in at least one main body component (31), and which apparatus is such that the compressors (17) are connected to the main body component (31) during use of the apparatus.
