Abstract (en)

[origin: EP1629741A2] The assembly has a body with two trays (101, 103) directly connected to each other and defining two housings having different products. An applicator device (102) has an application unit placed at the end of a handle. The tray (101) is immobilized relative to the tray (103) when the applicator device is mounted on the body and is moved relative to the tray (103) when the applicator device is removed from the body. An independent claim is also included for a utilization of a cosmetic product packaging and application assembly.
