Abstract (en)
Toy building block comprising a hollow three-dimensional structure with a plurality of faces (12) and provided on at least one of said faces with engagement means (28,36,38,40,42) able to co-operate with complementary engagement means of another block. The three-dimensional structure is formed by a pliable element (10) with a perimeter whose shape corresponds to the planar development of the block. The pliable element (10) is provided with hinges (14) between adjacent portions (12) forming the faces of the three-dimensional structure. Snap-in fastening means (16, 18) are provided for fastening each of said faces (12) to an adjacent face (12) of the three-dimensional structure.
