Abstract (en)  
[origin: EP1631115A1] The device has two hands free loudspeakers (2, 3) whose orthogonal projections are distinct on axes (D1, D2) in an open configuration. The speakers are disposed opposite to each other, such that their projections in a plane of a flap (5) belong to a diagonal axis (Dd) of the projection of the device in the plane, so that distances between the projections are relatively high, either on an axis (D1) or the axis (D2).
