Abstract (en)  
[origin: WO2004110274A1] The invention relates to a blood collection system for collecting blood for the purpose of analysis or diagnosis. The aim of the invention is to provide a system which allows the multiple use of lancets (5) stored in a lancet storage container (6) and which reduces the time until the pricking movement is carried out. For this purpose, a lancet tip protective element (13) is provided in a parking position for the lancets (5), which protective element mechanically and hygienically protects the lancet tips.
