Abstract (en)

[origin: WO2004103839A1] A container having a body portion (10) and a dispensing opening, a neck (14) surrounding said dispensing opening, the neck having a rim (20), an inner neck surface (18) and an outer neck surface (16), and a drip minimizing member (32, 68) extending inwardly over a portion of the dispensing outlet, the member being located proximate the rim (20), the member terminating in a sharp edge (34, 70) to minimize dripping when pouring from the container.
