Abstract (en)
[origin: WO2004108580A1] Car door (1) for lifts and/or elevators, comprising at least a pair of wings (3) with telescopic opening, each of which is integrally connected to a corresponding carriage (4) able to slide on a guide (5). The guide (5) is substantially curvilinear to allow the wings (3) to translate telescopically following a substantially curvilinear trajectory. In particular, the wings (3) have a substantially curvilinear external development. Floor door (2), in particular for lifts and/or elevators, originally comprising curvilinear wings (12) with central or lateral telescopic opening.
