Abstract (en)

[origin: WO2004101813A1] The invention provides a human KEL which is associated with the cardiovascular disorders, gastrointestinal and liver diseases, hematological disorders, inflammatory diseases, neurological disorders, reproduction disorders and urological disorders. The invention also provides essays for the identification of compounds useful in the treatment or prevention of cardiovascular disorders, gastrointestinal and liver diseases, hematological disorders, inflammatory diseases, neurological disorders, reproduction disorders and urological disorders. The invention also features compounds which bind to and/or activate or inhibit the activity of KEL as well as pharmaceutical compositions comprising such compounds.
