Abstract (en)

[origin: WO2004104469A1] A lining device for renovating the branch lines (15) of pipelines (14) by way of eversion includes a hose-shaped outer film (1) and an inner sleeve-shaped expandable reinforcing member (2) adapted to cure when subjected to ultraviolet light. At one end (3), the hose-shaped film (1) is adapted to be secured to the end of a tubular inserting member (4), and at the opposite end it is sealingly secured to a closing member (9). The closing member (9) carries a means (10) for securing a train of UV-lamps (12).
