Abstract (en)
[origin: WO2004104504A1] The invention relates to a drawer element (22) for a refrigeration device (21). Said drawer element comprises a body with at least one bottom (2) and two lateral walls (3) and a front flap (5) hinged to said body (1) and movable between a closed and an open position. Said front flap (5) is hinged to the body (1) at the level of a bottom (2). The front edges (11) of the lateral walls and the front flap (5) form a tongue and groove connection at least in the closed position.
