Abstract (en)
[origin: EP1471396A1] The mechanism has a date indicator with a series of dates from 1 to 31. An aperture (15) is sized to indicate seven dates according to seven days of a week registered in a dial. A date corrector has a series of dates from 1 to 6 to be partially superimposed on the date indicator. A needle (16) is pointed towards the aperture to indicate a date corresponding to the day of the week.
