Abstract (en)
The case has a base (2) and a cover (3) connected by rear pillars (7, 8) that define a free zone to constitute a traversing opening extending on entire rear side of the case. The base has front pillars (10) made up of same material as the pillars (7, 8). Peripheral skirts (4, 5) respectively extending from the base and the cover constitute a peripheral envelope, where the opening is closed by the skirts.
