Abstract (en)  
There is provided a showcase (1) comprising a display room (14) surrounded with a transparent wall (9). The costs of rack hanging structure in the display room (14) can be reduced. The showcase (1) comprises the display room (14) surrounded with a transparent wall (9) supported by support pillars (7,8) erected at four corners of a main body (3). The rack supporting portion having two or more engaging holes (33,34) is mounted to the pillar (7,8). The rack (2) for displaying commercial goods is hung in the display room (14) by being supported by the rack supporting portion (7A,7B). The rack receiving member (31) receives the rack (2) by engaging with the engaging hole (33,34) of the rack supporting portion (7A,8A). The rack receiving member (31) is made by bending a metal plate and has an engaging portion (31C) made by contact bending of the metal plate which is inserted into and engaged with the engaging hole (33,34).
