Abstract (en)

[origin: EP1632451A2] The method involves placing a tower (2) apart from a vehicle frame (3) and supporting the tower while transporting a lifting platform vehicle (10). The vehicle is routed across the frame until the tower and a vehicle roof edge are arranged one over another. A platform of the vehicle is moved in a direction towards the frame, where the tower and frame align against one another. An independent claim is also included for a device for transporting heavy vehicle.
