Abstract (en)
[origin: EP1632609A1] A trench wall is penetrated by an obstacle (1) such as a supply line and a pipe, in which lateral trench wall recesses (51, 52) are sunk on both sides of an obstacle. A lower trench wall recess (60) is formed below the obstacle, by laterally moving a soil removing trench wall apparatus from one of the lateral trench wall recesses. An independent claim is also included for a trench wall.
