Abstract (en)

The unit has an intercepting tank (2) inserted into an outlet shaft (1) in a liquid-tight manner and provided with a fluid down pipe. A floater (7) is guided in a floater housing (3) and forms a closing body for closing the pipe. The housing has a drainage opening in a lower section for the closed pipe, where the tank is attached to the pipe by a spill (5). The opening has a choke valve whose body is adjusted by an elevating screw.
