Abstract (en)

[origin: EP1632918A2] The device has a composite wire (6) comprising elementary electric wires (4, 5) insulated from each other by insulating units and mechanically assembled with each other. An electronic control device (2) detects the damage of the wires (4, 5) and the mutual contact of the wires (4, 5) with each other. The control device produces an output signal in its output (3) in case of the detection. Independent claims are also included for the following: (A) a wall or a security case comprising an electric fence security device (B) a utilization of an electric fence security device (C) a method for manufacturing a wall or a security case.
