Abstract (en)

[origin: WO2004105558A1] The invention relates to a door for a refrigerating device comprising a frame (4) and an insulation glazing consisting of at least one external pane (3) and an internal pane (6) fixed to said external pane (3) in such a way that an intermediate tight space is formed. The frame (4) is fixed to the external pane (3) in a marginal area of the external pane (3) projecting over the edge of the internal pane (6). A gap between the internal pane (6) and the frame (4) is filled out by means of sealing strips (29).
