Abstract (en)  
[origin: WO2004105604A2] The present invention relates to a device for delivering a medicament or a diagnostic agent to the skin or mucosa of an animal such as a human being, wherein a chamber filled with the medicament or the diagnostic agent is separate from the housing with a rod capable of transferring the medicament or the diagnostic agent to the animal. The chamber is connected to the housing with the rod before transfer of medicament or diagnostic agent. In particular the invention relates to a device for delivering allergens in allergy tests.
