Abstract (en)
[origin: WO2005000188A1] The present invention relates to a fitness machine (1) for training the body, comprising a frame (2) with a vibrating element (3), a vibration generator (4) operatively connected to the vibrating element (3), and a vibration damper (5), it being possible to set the vibration damper (5) in such a way that said vibration damper can absorb to a selected degree vibration produced by the vibrating element (3), as a result of which a training load desired by the user can be obtained.
