Abstract (en)

[origin: US2004229693A1] A gaming machine includes a cabinet having a game video display mounted on a front side of the cabinet. The gaming machine also includes at least one more additional video display mounted on the front side of the cabinet either above or below the game video display. A player control device is also mounted on the front side of the cabinet. This player control device may be separate from the video displays or may be integrated with one or more of the video displays in the form of a touch screen portion of one or more of the video displays. The player control device may include a separate touch screen display mounted on a ledge projecting forwardly from the front side of the gaming machine cabinet.
