Abstract (en)
[origin: WO2004103547A1] The invention relates to a holding device for substance libraries which can be used, more particularly, for the detection of target molecules with the aid substance libraries. Said device comprises: (i) a holder (101) for a substance library carrier; (ii) a substance library carrier (104) which can be fixed to the holder (101); (iii) a detection surface (107) applied to the substance library carrier (104) whereon a substance library is immobilised. At least the substance library carrier (104) can be introduced into a laboratory reaction tube.
