Abstract (en)

[origin: WO2004108374A1] The invention relates to a board consisting of a derived timber product, wherein wood chips or fibres and plastic particles or fibres are compressed with a binding agent according to a hot-pressing method in order to form a board. Some of the wood chips or fibres are substituted by a ground or defibrated agglomerate of mixed plastics from the waste disposal, and the particle size of wood chips or fibres and ground agglomerate is approximately the same.
